

FAX ENABLE YOUR WORLD®

FACSys® CONNECTOR FOR BOX.NET

Overview

The **FACSys® Connector for Box.net** utilizes Box.net™'s cloud content management solution to receive fax messages, allowing users to send documents directly to their Box folders from any FACSys client or connector - including our extensive family of MFP connectors.

Now virtually any MFP can scan documents directly to Box.net!

CENTRALIZED REPOSITORY FOR EASY STORAGE & SHARING

The **FACSys® Connector for Box.net** takes advantage of Box's cloud content management solution, making content instantly accessible and sharable from anywhere. Now, FACSys users can use any client - whether it's a FACSys-enabled MFP, mobile phone or application - to directly route content to and access it from a Box.net folder.

The FACSys Connector for Box.net is perfect for:

- Customers wanting to use a cloud-based solution to receive fax messages.
- Customers wanting to store scanned/copied documents from MFPs and network scanners directly to Box.
- Customers using off-the-shelf applications (such as Microsoft Office), which have FACSys connectivity (connector or add-on) to route documents directly to Box.
- Customers wanting to move documents from mobile devices directly to Box.

Founded in 2005, Box provides cloud content management for more than 4 million users and companies ranging from small businesses to Fortune 500 companies. Box's dynamic, flexible content management and collaboration solution empowers users to access and share content online, and gives IT professionals unprecedented visibility into how content moves within their organizations and beyond.
