

FAX ENABLE YOUR WORLD®

FACSys® Connectors

Fax Enable Your World®...it's what we've been saying for years. With the wide array of connectivity options included with the FACSys® Fax/Messaging suite of products, virtually any business process can be fax enabled to save time and money.

MFPs, office applications, mobile devices and even custom applications can be integrated with our ready-built connectors, application plug-ins or through the use of our AFM/SDK.

FACSys® CONNECTOR for Ricoh® ESA-enabled MFPs

The FACSys® Connector for Ricoh ESA-enabled MFPs fully integrates with the Ricoh Imagio MP-series MFPs, enabling users to transmit and print incoming faxes directly from the touch screens of these devices, fully leveraging the inherent print functions of a Ricoh MFP.

FACSys® CONNECTOR for Sharp® OSA™-enabled MFPs

The FACSys® Connector for Sharp OSA-enabled MFPs fully integrates with most Sharp MX-series MFPs, enabling users to transmit and print incoming faxes directly from the touch screens of these devices, fully leveraging the inherent print functions of a Sharp MFP.

FACSys® HP® MFP Fax Gateway

The FACSys® HP MFP Fax Gateway allows any user on the network to send faxes through a supported HP® MFP device - providing a cost-effective and cost-saving fax messaging solution for the office environment.

FACSys® CONNECTOR for Canon® imageRUNNER MFPs

The FACSys® Connector for Canon MEAP-enabled MFPs fully integrates with select Canon imageRUNNER-series multi-function devices, enabling users to transmit faxes directly from the touch screens of these machines. The secure and intuitive interface allows users to create new FACSys fax messages where they can define outgoing fax message properties such as recipients, subject, cover page, attachments and comments

FACSys® Xerox Fax Gateway

The FACSys® Xerox Fax Gateway enables the Xerox Document Center series of MFPs to send fax messages via the FACSys® fax server rather than dedicated fax hardware in each device. Through the use of the optional Scan-to-Fax Server option on the Xerox device, users can scan images and input fax destinations for delivery by the FACSys® server.

FACSys® INTEGRATION with Brother® MFCs

The FACSys® Fax/Messaging Gateway fully integrates with Brother Multi-Function Centers (MFCs), enabling users to scan content from the device directly into the FACSys® application, and facilitating compliance initiatives by archiving outbound messages.

FACSys® PLUG-IN for Microsoft® Office 2007

The FACSys® Fax/Messaging Gateway Plug-in for the 2007 Microsoft® Office System provides a quick and easy way to send faxes from Microsoft Outlook, Word, Excel and PowerPoint - including access to fax information stored in Outlook contacts.

FACSys® CONNECTOR for Microsoft® SharePoint

The FACSys® Connector for Microsoft® SharePoint allows FACSys® to be configured to publish inbound and outbound fax messages directly into the SharePoint server, as a FACSys Fax Document type.

FAX WHAT YOU WANT, WHEN YOU WANT AND HOW YOU WANT.

FAX ENABLE YOUR WORLD®

FACSys® CONNECTOR for eCopy™ ShareScan® OP

The FACSys® Connector for eCopy ShareScan OP software enables users to easily fax paper documents from a copier or document scanner. With eCopy Desktop™ software, users can retrieve inbound faxes for further manipulation and storage directly from their personal workstation. By seamlessly integrating with the FACSys® fax server, any user with network access, can annotate, email and OCR faxes right at their desktop.

FACSys® CONNECTOR for EFI® SendMe®

The FACSys® Connector for EFI SendMe enhances the document management application by presenting additional feature buttons and screens to simplify the delivery of the document on-screen. It also provides access to the FACSys® user's phone books and recipients, confirmation of delivery and repeat delivery of the document to another destination.

FACSys® CONNECTOR for Box.net

The FACSys® Connector for Box.net utilizes Box.net's cloud content management solution to receive fax messages, allowing users to send documents directly to their Box folders from any FACSys client or connector - including our extensive family of MFP connectors. Now virtually any MFP can scan documents directly to Box.net!

FACSys® CONNECTOR for Cortado

The FACSys® Connector for Cortado provides fax services to Cortado Corporate Server users. BlackBerry, iPhone, Android, Palm OS, Symbian, and Windows Mobile users are able to use the FACSys® infrastructure to fax from their mobile devices, which complements the copy/paste, print, PDF-export and corporate network access that the Cortado Corporate Server gives them.

FACSys® INTEGRATION with KeyScan Imaging-KeyBoard

The KeyScan KS810-P turns a typical user keyboard into a productivity tool: a filing system, copy/fax machine, searchable PDF-attachment-to-email creator and much more. Simply by inserting a document into the scanner, KeyScan's NoTouch-AutoScan can perform a preset default function with no additional button clicking - further enhancing productivity.

FACSys® CONNECTOR for SAP®

The FACSys® Connector for SAP has been certified for integration with SAP ECC 6.0 via the SAP integration scenario BCCON 3.1.

FACSys® INTEGRATION with ScanSoft® PaperPort® 11

The FACSys® Connector for ScanSoft PaperPort 11 fully integrates with the document management software to provide extended functionality. Users now have access to all of the enhanced functionality of PaperPort for advanced handling of their FACSys® fax messages.

FACSys® ACTIVE FAX MESSAGING SOFTWARE DEVELOPMENT KIT

The FACSys® AFM/SDK allows customers to fax-enable third-party applications by tightly integrating FACSys® with existing processes and applications in order to extend their capabilities.
